Introduction

With an innovative vision, TWTC aims to bridge fast-evolving digital currencies, modern financial technology, and the global tourism sector. Our goal is to create a unique experience combining investment and travel, where owning the token becomes a gateway to real travel opportunities, not just a trading tool.

Token Definition

TWTC is specifically designed to support tourism on the Binance Smart Chain (BSC). The token promotes cultural connection by offering holders chances to win free trips to top global destinations. Our project aims to be the bridge linking crypto power with the magic of travel, adding a social and human touch through cultural encounters in each journey.

Project Concept

- · Organizing free or subsidized trips for token holders.
- Promoting cultural exchange through direct interactions with local communities.
- Offering travel experiences that blend adventure, entertainment, and exploration.

Rewards Mechanism

Launch Phase: Once the token price reaches \$0.01, a one-month reward program will be launched through a random selection of all token holders. Subsequently, eligibility will be based on holding the token for at least one month, with longer holding periods increasing the chance to win a prize for two, including accommodation and tour programs.

Project Mission

"Travel Unites Us"

We believe that tourism is not a luxury but a means to connect and build bridges between cultures.

Token Objectives

- 1. Support the global tourism sector with real-world services.
- 2. Build a global community of investors and travelers.
- 3. Establish a strong brand in the cryptocurrency market.
- 4. Enhance trust through project transparency and fair token distribution.

Smart Contract Details

1. Name: Tourism World Token Crypto

2. Symbol: TWTC

3. Network: Binance Smart Chain (BSC)

4. Contract Type: BEP-20

5. Total Supply: 500,000,000 TWTC

6. Transaction Fee: 5% (for marketing, development, and rewards)

7. Anti-Whale System: maximum purchase and wallet holding limits

8. Token Listing:

9. Phase 1: Decentralized Exchanges (DEX)

10. Phase 2: Centralized Exchanges (CEX)

11. Phase 3: Develop app and website for global travel booking with TWTC, partnering with major hotels and travel companies.

Tokenomics

Category	%	Quantity	Notes
Community	75%	375,000,000	For trading, rewards, and investors
Marketing & Partners	5%	25,000,000	Promotional campaigns & strategic partnerships
Founders & Team	20%	100,000,000	Vesting stages for market protection

Roadmap

Phase 1 - Launch

- Deploy smart contract on BSC
- Launch official website & social media

- List token on decentralized exchanges (DEX)
- · Lock liquidity for one year

Phase 2 - Community Building

- Launch rewards program at \$0.01 token price
- Global marketing campaigns to attract investors and travel enthusiasts
- Establish partnerships with travel companies and hotels

Phase 3 - Expansion

- Launch TWTC-based travel booking platforms
- List token on centralized exchanges (CEX)
- Develop mobile application for full project integration

Conclusion

TWTC is not just a digital token; it is an invitation to travel, connect, and create unforgettable memories. By combining the power of cryptocurrency with the magic of tourism, we aim to provide a unique investment experience that offers both moral and financial returns.

Look at life from another perspective. One world unites us in peace, affection and joy. Enjoy life as it should
